

FOOTPATHS REPORT FEBRUARY 2009

Having walked all the footpaths over the past 2 months I can report that they are all able to be walked and are in good condition. The broken land drain pipe on Footpath 1 has been repaired and the jobs that Phil Turner said could be done have been done except one, and that is the Kissing Gate being installed in Footpath14. The land-owner has said that this will be done. There are two jobs that need doing; one is to replace the signpost on the A413 at the start/end of Footpath15 and the replacement of the stile on Footpath12 which has rotted due to the damp area it is in. I have rung Phil Turner about these but have had no reply as yet.

Apart from the usual strimming of Footpaths 1 and 14 there is no other work to be done unless anyone reports any other problems to me.

Howley
